CDC Plava Flax

Progress Through Research
Le progrès grâce à la recherche

Description:

CDC Plava is an early maturing, brown seeded flax variety with high grain yield and improved adaptation to northern areas.

Adaptation:

- All flax growing areas of western Canada

Pedigree:

- FP2114/FP2142

Strengths:

- 106% grain yield of CDC Bethune across all zones in the registration trials
- 2 days earlier maturing than CDC Bethune across all zones in the registration trials
- Resistant to flax rust and moderately resistant to fusarium wilt
- 1cm shorter than CDC Bethune
- Seed size similar to CDC Bethune

Neutral Traits:

- Moderately resistant to fusarium wilt
- Meal protein similar to the checks 41.7%

Weaknesses:

- Weaker straw strength compared to CDC Bethune

Breeder:

Dr. Helen Booker
Crop Development Centre
University of Saskatchewan
Saskatoon, SK

PBR 91 Protected

2012 to 2013 Western Cooperative Flax Registration Trials
